Gentlemen:

We have read the executive summary of your report. We are appalled that the only alternatives presented are three methods of channeling water around the delta. In our opinion the additional storage of water behind an Auburn dam and the potential for desalinization of seawater should be explored as alternatives. Also your report summary should plainly display for public review the economic devastation of choosing to abandon highly productive farmlands in favor of wildlife enhancement.

Thank you for giving us the opportunity to comment on this document.

Most sincerely,

Handwritten signatures of Gene Robinson and Bette Robinson. The signature of Gene Robinson is written above the signature of Bette Robinson.
